PROFILE

Sharia Financial Management graduate with banking business support, workflow design, and application testing experience. Designed spreadsheet-based inputs and reporting outputs for a banking operations user, built data-validation workflows, and documented application bugs. Brings finance knowledge and hands-on development experience to business process improvement and application testing.

PROFESSIONAL EXPERIENCE

System Process Automation Developer Dec 2025 - Aug 2026
Hedra.id | Jakarta Selatan, Indonesia

- Designed and implemented n8n and Robomotion RPA workflows to collect, validate, transform, and synchronize business data with internal systems.
- Structured data handoffs using JavaScript and REST APIs, including checks before information moved to the next step.

Business Performance Support Intern Jan 2025 - Feb 2025
Bank Muamalat Indonesia | Bandung, Indonesia

- Prepared and processed internal data for Bank Muamalat's regional Business Performance team.
- Supported the Sales Award program through records administration and coordination of regional activities.

Front-end Web Developer Intern Sep 2024 - Jan 2025
PT InTele Hub Indonesia | Jakarta Selatan, Indonesia

- Contributed to React and Next.js application maintenance, interface fixes, and migration from Pages Router to App Router.

Full-Stack Web Developer (Freelance) Nov 2024 - Dec 2024
APSMKSI | Bandung, Indonesia

- Developed and deployed the association's website, then maintained its features and updated content.

Web Developer Intern May 2024 - Aug 2024
Betr Beta | Remote | Singapore-based company

- Tested user flows, documented workflow and interface bugs, and supported fixes to authentication and dashboard features through Trello assignments.

SELECTED PROJECTS

Google Maps Review Monitoring | Independent Project | Google Sheets, Apps Script, n8n, Apify

- Designed Google Sheets inputs for a regional banking operations user to enter branch lists and trigger review collection, with date-based outputs the user could export for reporting.

Valance | Accounting Application Prototype | Next.js, PostgreSQL

- Developed Finance & Accounting modules for journal entries, ledgers, and financial statements in a web application prototype.

E-commerce Data Automation | Hedra Project | Robomotion RPA, n8n, JavaScript

- Built a workflow for product listing collection, data normalization, candidate and price validation, and structured price summaries.
- Connected RPA collection with n8n through HTTP callbacks, with run logging and downstream data synchronization.

EDUCATION
